- 4 All activities at own risk and you are required to sign the Indemnity and Informed Consent

We are service providers for adventure guide training and qualifications, as well as general public safety and technical outdoor skills. Founded in 2007, AsAfrica has trained hundreds of working guides in a range of skills from abseiling to ziplining and including hiking, rafting, mountain biking and 4x4. We assess and certify for CATHSSETA, the official Tourism and Hospitality education and training authority. Guides who hold the GASG certificate, badge and card, are legal in terms of the Tourism Act. Our support gets candidates through the process and into jobs.
